SCENTICONE™

The fragrance solution for any small indoor area...

Brandaroma's latest innovation in fragrance delivery is the versatile Scentcone™. The Scentcone™ efficiently fragrances an indoor area of up to 50m² using fragrance discs that last up to 45 days. Brandaroma's latest fragrance disc technology eliminates the chance of spillages and the need for regular re-fills. The fragrance intensity is fully adjustable by adding or removing fragrance discs and comes with a built-in fan to propel the scent. The Scentcone™ is easy to run, safe to use and a low cost solution.

Complementing both modern and classic interiors, the Scentcone™ is available in three standard colours in addition to custom colours on request. The discs can be developed in all fragrances including those using Brandaroma's extensive Odourfoyl™ technology.
