

brandaroma™
the fragrance machine

ADS:HC

Create perfect fragrant ambience in a big space from one simple and efficient system!

Brandaroma's large room solutions just got more effective and efficient. Our new technology and specialised fragrance formulations allow for a superior fragrance experience and the increased efficiency results in lower overall fragrance usage and subsequent VOC emissions. The ADS:HC™ is capable of fragrancing an indoor space from 1000m² up to 5000m².

With a choice of hundreds of fabulous fragrances, and the option to create your own signature scent, you're only a call away from making your space so special.

ADS:HC™ converts fragrance oil into a microscopic dry and skin safe vapour that mixes with air flowing through your air conditioning ducting, and fills your chosen space with an expertly developed beautiful scent, unspoilt by our ingenious diffusion process. The installation is complete in only a few hours, and so everyone is ready to enjoy the many benefits quickly.

All our ADS systems achieve an even distribution of fragrance throughout your indoor area, and is fully adjustable to suit your tastes and needs either subtle or strong, no matter how big!

ADS:HC™ - you know it makes scents!
