

# Deliver emotion enhancing fragrances with Brandaroma's Ambient Diffusion System

Brandaroma's portable 'set and forget' fragrance diffusion system, known as the MONO™, efficiently distributes fragrance throughout an indoor area of up to 400m<sup>2</sup>. The atomisation system diffuses premium liquid fragrances to a dry vapour before being fan-forced out of the unit into the desired space. It is the jet-stream around the fragrance that ensures the fragrance is driven into existing air-flows. The refined atomising technology achieves the finest mist whilst preserving the fragrance's full integrity.

The MONO™ is a contemporary design which will complement any environment. Equipped with 7 day/24 hour timer that can select different fragrance diffusion periods. There is also a 15 pre-set daily combination timer. It comes with the option of a remote control and can be free standing or wall mounted.

The portable unit is easy to install and requires no maintenance other than simply replacing the fragrance container. Furthermore, the MONO™ offers customers the option of adopting a permanent or temporary fragrance delivery system.

The MONO™ is perfect for point of sale purchases, product launches or special events. Alternatively, 'set and forget' in any indoor area.
